## **Sentry Security Systems Inc. announces the Sentry line of Security Cameras**

*Sony™ CCD Technology, exceptional video quality, astonishingly competitive price*

**Kingston — February 18, 2005** — Sentry Security Systems Inc is pleased to announce the release of its new Sentry line of CCTV security cameras. Sentry spent over a year researching as many manufacturers as we could find and then spent over a month actually visiting the best of them. We were able to narrow our prospective manufacturers down to three, based on product quality, product performance, technical capability, R&D, manufacturing capability, quality control and financial stability. Our relationship with these companies allows us to have CCTV security cameras manufactured to our specifications, specifically tailored to produce optimum video quality on Sentry V, LE and H Series DVRs.

"In addition to selecting the best manufacturers we could find, we also have our own agent who performs a complete finished goods quality control audit on all products to be shipped to us" said Michael Demmons, Business Development Manager at Sentry Security Systems Inc. "The Sentry line of security cameras opens up huge new business opportunities for our dealers and resellers by supplying them with a premium line of security cameras at highly competitive prices."

The Sentry line of CCTV security cameras also fills holes in our Mintron product line. Longer range IR weatherproof cameras; true day/night color/B&W cameras and weatherproof, vandal resistant dome cameras are just some of the Sentry CCTV cameras that we offer. As customer requirements demand, we will continue to add additional Sentry cameras into our product line.

## **Sentry Security Systems Inc.**
