

Best Buy Drug Store

"I have recommended, and will continue to recommend Digital Video Security Systems from Sentry Security Systems Inc., to other pharmacy and business owners"
- Dale McCleskey owner of a Albuquerque-based retail pharmacy store called Best Buy Drug Store

Company: Best Buy Drug Store, an Albuquerque-based retail pharmacy store owned by Dale McCleskey, strives to fulfill the pharmaceutical needs of its clientele. Having been in the retail pharmacy business for many years, Dale McCleskey is no stranger to theft, robbery and vandalism.

Solution: While attending the McKesson Pharmacy Strategies Conference and Trade Show 2004 in San Diego, Dale stopped by Sentry Security Systems booth to see their Digital Video Security Systems. After explaining the layout of his store and his areas of concern, Sentry Representative Ken Allsopp recommended a twelve camera Sentry LE video security package with an additional four camera expansion card allowing for up to four more cameras to be installed should they be needed at a later date.

Upon returning home to Albuquerque after the show, Dale ordered the system that was recommended and installed it himself without any problems. "I had one question during installation so I called Sentry's toll free number and my question was answered quickly and understandably!" said Dale, "since then, I've called one other time and was pleased with the service and support I received".

So far, the Sentry LE Series System has performed flawlessly and has provided valuable video security evidence on several occasions. The Sentry LE Series System provided detailed video evidence of a break-in that occurred during the night as well as catching a narcotics user who, while a clerk was verifying payment information, emptied a bottle of pills into her purse. In a more serious incident when Dale's store and fourteen other neighboring stores were robbed at gun point, the Sentry LE Series captured video evidence of the armed robber from a camera mounted behind the cash register. Because of the high quality video produced by the Sentry LE Series DVR, exported video from the Sentry DVR was able to be shown on the local evening TV News resulting in the armed robber being identified and caught soon after. The armed robber likely would have never been caught had it not been for Dale's Sentry LE Series Digital Video Security System.
