

Findley Brother's

"No other long range digital wireless products that we've used compare for range, ease-of-installation, setup and price."

– **Aaron Findley, Findley Brother's**

Challenge: Findley Brother's required a solution to control, view and record video from PTZ cameras within a 3 mile radius of their dispatch center. The application demanded high speed, high resolution video without direct line of sight.

Solution: Having been a loyal Sentry Security Systems dealer for over 3 years offering a variety of Sentry products to their customers, Findley Brother's decided to go with the Sentry SDW-24005G long range wireless transceiver, video server and object tracking PTZ. "After a comprehensive overview from our Account Manager, I knew I could trust Sentry's proposed solution" said Aaron Findley.

After mounting the Sentry equipment on a radio tower 50ft high, a 12Mb connection was established from 3 miles away. "Without using any bulky reflector dishes, we were able to control the PTZ at full D1 resolution with almost no lag time" said Aaron Findley, "this new wireless product combined with other high performing, lower cost products from Sentry has greatly enhanced our business's video surveillance offering".
