- Simultaneous viewing, recording, playback and remote access
- PTZ camera controls
- Hybrid Compatible with Sentry RP IP Cameras
- Sentry 3 Year Extended Service and Support Plan Included
- Remote access via iPhone™, Blackberry™ and Android™ Phones

Description

The Sentry RP Series of PC-based DVRs is particularly suited for demanding security applications that require real-time audio and video, high resolution, large storage capacity, multiple system installations and up to 48 channels of video and audio.

Based on a H.264 hardware compressed platform, the Sentry RP Series provides a real-time audio and video system of up to 48 cameras without the excessive load on the system hardware typical of software compressed systems. H.264 compression provides amazing video quality, resolution up to 704 x 480 (D1) and small frame/file sizes, allowing remote users to view live and recorded video at remarkably fast speeds. The Sentry RP Series Remote Client software provides the ability to view video from multiple Sentry RP DVRs all on the same system.
